I have lived my life in the valleys, I have lived my life on the hills...

(New Order 1984 Thieves Like Us)

This study was conducted within the framework of two larger research projects, namely the DFG Research Training Group “Archaeology of Pre-Modern Economies” of the Universities of Bonn and Cologne and the Palpa Archaeological Project of the German Archaeological Institute. Without the financial support of the German Research Foundation (DFG), that provides funding for the “Archaeology of Pre-Modern Economies” research group and provided partial funding for the Palpa Project, this work could not have been realized. I am extremely grateful for the opportunity to write this book and thankful to the many individuals who helped me during this process in one way or another.

The stimulating and challenging environment of the “Archaeology of Pre-Modern Economies” research group contributed greatly to my theoretical and methodological approach in this work. I appreciated it immensely that I was able to focus on my specific research questions, while keeping a broad perspective due to the input from other academic disciplines. Many scholars are involved in the “Archaeology of Pre-Modern Economies” research group and I am aware that I could name more persons at this point. I thank explicitly Martin Bentz, Timothy Earle, Nikolai Grube, Michael Heinzelmann, Willem Jongman, Sabine Schrenk, Bethany Walker, and Andreas Zimmermann for their commitment to this project. I am indebted to Tobias Helms for introducing me to lithic studies and for spending his time in helping me to organize my material. In a similar way, I am thankful to Tim Kerig with whom I could discuss a wide range of topics related to this research. For important breaks in which we discussed our research projects and other things, I thank Zakariya Na’imat (tea), Luigi Pinchetti (coffee), and Giorgos Papantoniou (cigarettes). Special credit goes to Ina Borkenstein for her excellent organizational skills that maintain the “Archaeology of Pre-Modern Economies” research group.

I am thankful to the entire team of the Palpa Archaeological Project and particularly grateful to Markus Reindel, for his inspiring guidance throughout this research and his continuous support and encouragement over the last years. Furthermore, special thanks goes to

Johny Isla, for discussions on Andean archaeology and economy as well as for providing me with essential information and material in Peru and Europe. Emilia Schmidt earns my thankfulness not only for keeping me updated with the latest Paracas literature, but also for some shared thoughts during the procedure of writing a thesis. Many thanks go to Volker Soßna who provided me with all kinds of maps and for his advices related to geographic information systems (GIS). I thank Hermann Gorbahn for sharing data and his recommendations on the conception of this work, especially during the initial stages of research. Benedikt Gräfinholt discussed and shared the data of his doctoral project with me, for which I owe him sincere thanks. In addition, I am much obliged to my colleagues Heike Otten, Mareike Mölders, Judith Astuhuamán Blanco, Pablo Jiménez Salinas, Daniela Oestreich, and Hernán Carrillo, for turning fieldwork in Peru and project meetings into nice experiences.

The publication of this book in the series *Forschungen zur Archäologie Außereuropäischer Kulturen* was made possible by the Commission for Archaeology of Non-European Cultures (KAAK) of the German Archaeological Institute (DAI). For this opportunity, I express my thanks in particular to Burkhard Vogt, Jörg Linstädter, Markus Reindel, and Heiko Prümers.

I cannot thank enough Stefan Hölzl for enabling me to perform strontium isotope analyses on Andean camelid teeth at the Laboratory for Radiogenic Isotopes of the RiesKraterMuseum in Nördlingen, Germany. Without his generous support and the immense help of Karin Heck and Gabriele Knie, this analysis could not have been finalized. Besides, I enjoyed the stays in Nördlingen a lot. I also want to acknowledge the Peruvian Ministry of Culture for the export permit of the camelid teeth sample in order to conduct the strontium isotope analysis (Resolución Viceministerial 139-2015-VMPCIC-MC). Manuel Gorriti Manchego earns a special recognition of my gratitude for his species identifications of the excavated mollusk remains and for sharing his profound knowledge of archaeomalacology. I have to admit that my head was burning shortly after our meetings, but these meetings helped me to a large extent to understand the malacological material.

Jonas Bens accompanied me on a hike through the study area from the puna zone in the highlands to the Pacific Ocean in 2014, the most amazing and, at the

same time, physically most demanding two weeks of these three years of research. I will never forget this experience and I am happy that I could spend this time with Jonas. Thanks to a congress travel grant from the German Academic Exchange Service (DAAD) in 2015, I was able to present the first results of this doctoral project at the 55th International Congress of Americanists in San Salvador, El Salvador. I am most grateful for the possibility to attend this conference.

I specifically want to thank my thesis supervisors – Nikolai Grube and Karoline Noack – for their manifold support, motivation, valuable advices, and constructive comments at various stages of this research. Likewise, I was supported by my “extended supervisors” – Markus Reindel and Martin Bentz – who I could always rely on.

My English editor, Caitlin Chaves Yates, deserves a great deal of credit for her invaluable comments on this

text, not only with regard to language and style, but also at the conceptual and archaeological level. Christina Kolb was a huge help in editing most of the archaeological material images in this book. I thank Christina for her work, for tolerating my special requests, and for constantly removing “lines” when I saw them. Further persons that I would like to thank for their involvement include Geoffrey Braswell, Nicholas Tripcevich, José Ochatoma Paravicino, Wilfredo Molina Alvarado, José Canziani Amico, Daniela Salvucci, Christoph Breitzkreuz, Rainer Hutterer, Sonja Tomasso, Diego Fittipaldi, Michael Beykirch, and Umut Yılmaz.

To my family and friends, who are certainly my biggest support, I should rather apologize for the missed times and my occasional bad moods. I will take the easy way out: let us blame the following.
