## List of Maps

- Map 1: The location of the study area in southern Peru. The inlay map at the lower left uses a standard geographic coordinate system while the main map and the inlay map on the lower right are projected to UTM, zone 18 S.  
Map: VS. .... 21
- Map 2: Location of geoarchives in the Palpa region studied by the research teams from Jena (Hesse 2008, Hesse & Baade 2009), Heidelberg/Kiel (Eitel et al. 2005, Mächtle 2007, Mächtle & Eitel 2013, Unkel et al. 2007), and Cologne (Schitteck et al. 2012).  
Map: VS, orthoPhoto: ETH Zürich – IGP. .... 35
- Map 3: Location of the geoarchives considered for the reconstruction of the paleo-climate of the study area.  
Map: VS. .... 37
- Map 4: Environment classification after Troll (a), Tosi/ONERN (b), and Pulgar Vidal (c,d). Map a) is based on Troll 1931, p.273, but clipped to a section between 0–24° southern latitude. Map b) shows a simplified zonation compared to the second edition of the ecological map (ONERN 1976). Similar life zones were grouped and the color set used here differs from the original. Maps c) and d) are based on an ASTER–DEM classified according to the altitudinal zonation proposed by Pulgar Vidal (Pulgar Vidal 1981, cf. map on p. 12).  
Map: VS. .... 44
- Map 5: Cultural macro-regions of the Central Andes and important archaeological sites mentioned in the text. The study area is located in the transition zone between South Coast and Central Highlands.  
Map: VS. .... 51
- Map 6: Location of sites mentioned in the text and areas in which archaeological surface prospection has been carried out by different scholars.  
Map: VS. .... 59
- Map 7: Mentioned archaeological sites on the South Coast and in the adjacent highlands. See Map 6 for details of the Río Grande drainage.  
Map: VS. .... 60
- Map 8: Areas potentially suitable for agriculture under hyper-arid, arid, and semi-arid conditions, according to the values given in Tab. 1. The upper limit is determined by the AMMTGS and may have fluctuated considerably (Tab. 3).  
Maps: VS. .... 87
- Map 9: The study area in the northern part of the Río Grande de Nasca drainage. The area is divided into 13 sections in order to ease geographic orientation.
